15mm Low Iron Float Glass- Perfect Decorative Materials For Furniture & Building

15mm Low iron float glass is a kind of glass of low iron content, which the iron content is approximately equal to a quarter of standard clear float glass.Because of the low iron content,15mm low iron float glass looks more translucent than 15mm Clear Float Glass.Thus,15mm Low Iron Float Glass also called 15mm Ultra Clear Float Glass,15mm Crystal Glass,15mm Extra Clear Float Glass,15mm Super Clear Glass,15mm Super White Glass, and 15mm Starphire Glass.

15mm Low Iron Float Glass has the main characteristics of 15mm Clear Float Glass.It can be cut to size as required, processed to processing glass such as 15mm Low Iron Tempered Glass, 15mm Starphire Silkscreen Printing Glass,15mm Ultra Clear Acid Etched Glass,Low Iron Insulated Glass ,Ultra Clear Laminated Glass and etc..

Specification:

1.Glass name: 15mm Low Iron Float Glass
2.Other Names: 15mm Ultra Clear Float Glass,15mm Crystal Glass, 15mm Extra Clear Glass,15mm Super Clear Glass,15mm Super White Glass and 15mm Starphire Glass etc..
3.Shape: flat
4.Thickness: 4mm, 5mm, 6mm, 8mm, 10mm, 12mm, 15mm, 19mm
5.Stock Size: 1830mm*2440mm, 2140mm*3300mm, 2250mm*3300mm,2140*3660mm
6.Delivery Time: 3-7 days after deposit payment received
7.Processing range: Can be processed to tempered glass, laminated glass, insulated glass, silkscreen glass and frosted glass.

15MM Low Iron Float glass Features:

1. Surface: Extremely smooth and flat, pure and clean like crystal.

2. Performance: Can reflect true colors of things behind,the light transmittance can reach 91%.

3.Colorless, extra clear.

4.Compare to 15mm Clear Float Glass, 15mm Ultra Clear Float Glass has 10% low iron content, that’s the reason it has higher light transmission and beautiful color consistency.

5. When 15mm Ultra Clear Float Glass are applied to the production of 15mm Ultra Clear Tempered Glass,it can reduce the spontaneous explosion possibility because of the low content of impurities, such as the Nis.

Production Services:

1.Can be cut into customized size

2.Can provide Low Iron Tempered Glass, Ultra Clear Frosted Glass, Starphire Silkscreen Glass
Super White Laminated Glass, Ultra Clear Insulated Glass, etc.

3.Can provide processing services, such as: drawing CAD, drill holes, cut notches, polished edge, etc.

Applications of 15MM Low Iron Float Glass:

1.15mm Low Iron Float Glass can be used as windows,table tops, table coverings,doors, railings,fences, balcony breast board,etc..

2. 15mm Low Iron Float Glass can be processed to laminated glass,insulated glass,tempered glass,frosted glass,silk screen printing glass for wide usage of construction and furniture.
