SZG-Glass manufacturer-Building Glass-Decorative Glass 10mm+10mm Wire Mesh tempered laminated glass

21.52mm EVA wire mesh tempered laminated glass is a kind of safety glass with excellent decoration effect. The production of wired mesh toughened laminated glass is almost the same as normal toughened laminated glass. 21.52mm EVA wire mesh tempered laminated glass is produced by making two pieces of **10mm tempered glass** inserted by EVA film and the metal mesh, after heating and high pressure, the glass panels will be tightly glued together. The wire mesh security glass has all safety features of **normal laminated glass**, but it's much stronger because of the metal wire mesh in the middle.

Notice:

All processes such as drilling holes, polishing edge, rounding corners, cutouts, cutting notches, etc. must be finished before being tempered and then laminated.

Specifications:

Glass name: 21.52mm wire mesh tempered laminated glass
Other name: Metal mesh steel laminated glass 10mm+10mm, 21.52mm wire mesh security glass, 10mm+10mm EVA stainless steel wire mesh laminated glass, 10+10 tempered laminated glass, etc.
Composition: 10mm ultra clear tempered glass +1.52mm EVA interlayer & metal mesh steel + 10mm ultra clear tempered glass, etc.
Interlayer thickness: 0.38mm, 0.76mm, 1.52mm, 2.28mm, etc.
Maximum Size: 3300M*12M
Package: Safety exportation wooden crates
Delivery: 7-15 days, urgent services are available.

Features & Advantages:

1.Safety: The debris still stick to the film and won’t fall off when the wire mesh laminated glass is broken.

2.Sound proof: The EVA interlayer of 21.52mm wired mesh laminated glass can block the sound transmission to a certain extent.
3.Optical performance: EVA wire mesh laminated glass can reduce the transmission of sunshine, lower the temperature indoor.
4.Anti-UV rays: EVA laminated glass can reduce most of the transmission of harmful ultraviolet radiation.
5.10mm+10m EVA wire mesh laminated glass is much harder than normal laminated glass.
6.Good appearance, good for decoration.

Application:

Wire mesh laminated glass is widely used for real estate, hotel, commercial building, office,bank, supermarket, Jewelry shop, museum, exhibition hall, library, insurance company, police station, prison and etc. It’s usually used as:
Glass door, windows, .partition wall, screen, staircase, curtain wall and so on.

Quality standards:

The 21.52MM EVA wire mesh laminated glass produced by Sun Global glass CO.,ltd is up to following standards:
1. EN 12150 CE certificate of European safety glass standard.
2. BS 6206 certificate of UK safety glass standard.
3. Chinese Safety Glass Compulsory Certification (CCC) and ISO 9001.
