SGG Light Green Float Glass 6mm - Excellent decorative glass

6mm light green tinted float glass is also called 6mm French green float glass, 6mm F green glass, 6mm light green glass sheet, heat-absorbing glass or colored glass, but it's different from stained glass. It's produced via adding colorant in clear float glass, the production is the same as **6mm clear float glass**, except adding metal or other elements. 6mm light green tinted float glass not only can significantly absorb the heat rays energy from the sunshine, but also keep the good energy-saving and transparency feature of decorative glass.
