

## □19mm Low iron float glass- Perfect Decorative Materials For Furniture & Building

19mm Low iron float glass is also called 19mm Ultra Clear Float Glass, 19mm Crystal Glass, 19mm Extra Clear Float Glass, 19mm Super Clear Glass, 19mm Super White Glass, and 19mm Starphire Glass. Because of the low iron content, 19mm low iron float glass looks more translucent than [19mm Clear Float Glass](#). Its iron content is approximately equal to a quarter of standard clear float glass. Thus, 19mm Low Iron Float Glass has the main characteristics of 19mm Clear Float Glass. It can be cut to size as required, processed to processing glass such as 19mm Ultra Clear Acid Etched Glass, 19mm Low Iron Tempered Glass, 19mm Starphire Silkscreen Printing Glass, Ultra Clear Laminated Glass, Low Iron Insulated Glass, etc..

**Specification:**

**1.Glass name:** 19mm Low Iron Float Glass

**2.Shape:** flat

**3.Other Names:** 19mm Extra Clear Glass, 19mm Crystal Glass, 19mm Ultra Clear Float Glass, 19mm Super Clear Glass,19mm Starphire Glass and 19mm Super White Glass,etc..

**4.Thickness:** 4mm, 5mm, 6mm, 8mm, 10mm, 12mm, 15mm, 19mm

**5.Stock Size:** 1830mm\*2440mm, 2140mm\*3300mm, 2140\*3660mm, 2250mm\*3300mm

**6.Package:** Packed with strong exportation wooden crates

**7.Processing range:** Can be processed to tempered glass,insulated glass,laminated glass, frosted glass and silkscreen glass

### **Sun Global Glass 19mm Low iron float glass Main Features:**

1. Surface: Extremely smooth and flat, pure and translucent like crystal.
2. Performance:the light transmittance can reach 91%. It can reflect true colors of things behind.
3. When 19mm Low Iron Float Glass are applied to the production of 19mm Ultra Clear Tempered Glass,it can reduce the spontaneous explosion possibility because of the low content of impurities, such as the Nis.
- 4.Compared to 19mm Clear Float Glass, 19mm Low Iron Float Glass has 10% low iron content, that's the reason it has higher light transmission and beautiful color consistency. When 19mm Low Iron Float Glass are applied to the production of 19mm Ultra Clear Tempered Glass,it can reduce the spontaneous explosion possibility because of the low content of? impurities, such as the Nis.
5. Colorless, extra clear, translucent.

### **Production Services:**

- 1.Can be cut into customized sizes.
- 2.Can provide Low Iron Tempered Glass, Ultra Clear Frosted Glass, Starphire Silkscreen Glass Super White Laminated Glass, Ultra Clear Insulated Glass, etc.
- 3.Can provide processing services, such as: drawing CAD, drill holes, cut notches, polished edge, etc.

### **□19mm Low iron float glass Application:**

1. 19mm Low Iron Float Glass can be processed to tempered glass, laminated glass,insulated glass, frosted glass,silk screen printing glass for wide usage.
2. 19mm Low Iron Float Glass can be used for windows,doors, railings, table tops, table coverings,fences, balcony breast board,etc..

**Production:**
