

21.52 mm clear toughened laminated glass balustrade supplier and manufacturer in China

Glass railing a glass balustrade whenever a spectacular results to their homes or other buildings. Bring a flare of modern to any space while also many other advantages. especially in comparison with other traditional building materials.

it also installation.glass simple balustrade is more secure than the traditional balcony.that due to its solid design and CNC cutting machine, so the difference between glass and accessories is very small.it can fit roman near glass can be produced by tempered transparent, ultra clear frosted glass of tempered glass, tempered glass, reflective glass, tempered glass glass silkscreen, but SGP Sentinel Film laminated glass is extremely safety.it can withstand hurricanes

Specification of 21.52 mm clear toughened laminated glass railings:

1) 21.52 clear tempered laminated can be combined with tempered glass 10 mm + 1.52PVB, film EVA or SGP + 10 mm toughened clear glass, if you use SGP film tempered laminated glass balustrade, which can withstand the strong wind, can keep people security hardening the environment

(2) other thickness coating mm available intermediary 0.76 1.14 mm, 1.9 mm

(3) PVB options: clear, white, milky white, any pantone color

(4) curved and flat in shape of are available.

The advantages of handrail tempered laminated glass in comparison with tempered glass railing

Tempered laminated glass is more secure than tempered glass, glass once broken, the interlayer are stuck fragments, fragments do not discard and do harm to the human body. That you can imagine once fallen fragments of glass apart from upper air, is really dangerous, but if using laminated tempered glass, you can avoid this case.

The advantages of tempered laminated glass handrail:

(1). glass balustrade are eco-friendly: If those who care environment, don't worry it. because glass balustrade eco-friendly, it can be recycled.

(2) easy to maintain the laminated glass: It is easy to clean. If a glass balustrade is damaged or scratch, which you can easily restore it to its original beauty by polishing. This is an important advantage than wood or metal simply cannot compete with.

(3) security: 21.52 mm tempered glass laminated is extremely high security. People are prejudiced against the glass because they think that it has potential risks. Don't worry about it. Tempered laminated glass is difficult broken unless serious situations. Even broken fragments not strong, they do damage to human
