

Tinted Glass 10mm thk Ford Blue are produced on the base of clear float glass, that is to mix them with a prescribed quantity of ford blue tint agent into the clear float glass raw materials, which flows through tweek to Tin Bath and then to lehr. While floating through the molten tin, the glass under the works of gravity and surface tension becomes smooth and flat at both sides. The amazing advantage of ford blue tinted glass is that It can reduce solar transmittance.

The main usage of 10MM Ford Blue Tinted Glass:

- 1.Can be applied for 10MM Ford Blue Tempered Glass production, they can have customized size and shape;
- 2.Can be applied for 10MM Ford Blue [Heat Strengthened Glass](#) production, they can bespoke size and shape;
