

SZG 4mm lacquered glass- best building glass manufacturers and factory in China

Paint glass or lacquered glass also called back paint glass. 4mm Lacquered glass is colored and opaque in appearance, produced by depositing and then baking a coating of lacquer to one side of [4mm clear glass](#). Lacquer is a solution of film-forming materials, natural or synthetic, usually applied as an ornamental or protective coating. Lacquered glass is painted on the back of the glass in the oven under 30-45 degrees for 8-12 hours, commonly used to dry naturally. The paint may easily fall off in humid environment.

As we all know, the paint has a certain harm to the human body, we should pay attention to the use of environmentally friendly raw materials and coatings in the paint glass production, to ensure that meet the requirements of modern environmental protection and human health and safety needs.

Features of lacquered glass:

1. Water resistance, acid and alkali resistance.
2. Use of environmentally friendly paint, healthy and safety.
3. Strong adhesion, not so easy to fall off.
4. Excellent anti-skid performance.
5. Anti-ultraviolet, strong anti-color aging feature.
6. Rich color of choice.
7. Strong weather resistance and structural adhesive compatibility.
8. Strong stain resistance, easy to clean.
