

Glass perfect decorative materials SGG 4mm light blue float glass

4mm light blue float glass is also called 4mm ford blue float glass. It's is produced in the same way as [4mm clear float glass](#) except adding metal or other Elements during the production of 4mm clear float glass. It can reduce both visual and radiant transmittance. This coloration is achieved through adding metal oxides at the smelting stage and can effectively reduce heat transfer and sunlight control.

Features:

- 1. UV rays:** Even 80% of the transmission of harmful ultraviolet radiation can be reduced by 4mm light blue float glass.
- 2. Solar control:** 4mm light blue float glass can reduce the heat transfer and sunlight control and energy. It can absorb more visible light, make the sunshine becomes downy, avoid dazzle and improve the color indoor.
- 3. Processing range:** It's good for processing because of the high quality. For example, it can be cut to the size in need,tempered,edge grinding and processed to frosted glass,insulated glass, silk screen printing glass, laminated glass and etc..
- 4. Decoration:** Offer more options for exterior and interior decoration.
