

5mm lacquered glass--Colorful & Opaque Appearant with Vivid pattern printing

5mm Colorful Lacquered Glass have been playing a important role in both residential decoration and commercial decoration. You can see it everywhere, in homes, offices, hotels, shops and museums, and so on. Clear Glass fused with colored lacquer can create smooth, homogenous surfaces as wall-paneling, in furniture and in wardrobe and cupboard doors, and so on.

In this section the Lacquered Glass 5mm thickness is produced by paint depositing and baking a coating of lacquer to on one side of [5mm clear float glass](#) or [5mm ultra clear float glass](#). The lacquer is a solution of film forming materials, it is natural or synthetic, usually applied as an ornamental or protective coating.

The production material of 5mm clear glass must have flawless appearance and flatter surfaces, to make sure colored lacquer to be with the brilliance of glass. There are multi-colour for options as per Pantone Number. Please note that 6mm Colored Lacquered Glass have opaque in appearance, no light

transmittance is allowed. When they are applied to different places, the architect can have different design with special pattern painting. Shenzhen Sun Global Glass Co., Limited can produce customized Colored Painted Glass with specific design to meet different demanding locations, such as bathroom, kitchen splash panel.

3. A durable and flawless finish. When Colored Lacquered Glass is applied to the back of the glass, it is protected from damage, easy to clean and maintain.
4. Resistance to humidity.

Processing Range:

After the coat of lacquer has been bonded, the final product can be cut, edge-worked and drilled like

ordinary mirrored glass. When cutting the glass, it is important to place the sheet with the lacquered face down on a clean cutting table to avoid damaging the lacquer. This variety of glass can be customized by cold-painting decorative patterns or logos onto the glass surface. It can also be sandblasted and engraved. Different effects can be achieved, depending on whether the glass or lacquered face is treated.

Applications:

Can be as glass partition walls, glass doors, glass balcony railing, etc.
