

SGG 5mm Light Grey Float Glass On Sale- Excellent decorative glass materials

5mm light grey float glass is produced by the float process with the addition of small quantities of metal oxides to color the normal clear glass mix. It can reduce both visual and radiant transmittance but part of the absorbed heat continues to pass through the glass by conduction and re-radiation. This coloration is achieved through adding metal oxides at the smelting stage and can effectively reduce heat transfer and sunlight control.

Features:

1. **UV rays:** Even 80% of the transmission of harmful ultraviolet radiation can be reduced by 5mm light grey float glass.
2. **Solar control:** 5mm light grey float glass can reduce the heat transfer and sunlight control and energy, absorb solar ultraviolet rays, effectively prevent fading and deterioration of interior items.
3. **Processing range:** It's good for processing because of the high quality. For example, it can be cut to the size in need, tempered, edge grinding and processed to insulated glass, frosted glass, laminated glass, silk screen printing glass etc..
4. **Clear view:** 5mm light grey float glass is transparency, so that the outdoor scenery can be observed clearly.
