

SGG Silver Mirror Glass - Super flat and clear, resistance of humidity for long time!

Sun Global Glass Silver mirror is manufactured by using distortion-free float glass, double processing worked by coating silver film, and two layers of waterproof paints on the surface of glass. due to its transparency, ease of fabrication, rigidity, hardness, and ability to take a smooth finish. The reflective coating is typically applied to the back surface of the glass, so that thereflecting side of the coating is protected from corrosion and accidental damage by the glass on one side and the coating itselnd optional paint for further protection on the other.

Features:

- 1. clear vision:** made of high quality mirror grade clear float glass and ultimate technique, we provide super clear and distortion-free image reflection silver mirrors. Perfect for decoration.
