

SZG 25.52mm tempered laminated glass- best building glass manufacturers and factory in China

25.52mm toughened laminated glass is a kind of laminated glass, which is made of two layers of 12mm tempered glass and sandwich together. The middle layer is PVB film, after heating and high-pressure special process, the two layers of glass adhesion together. With the process of lamination, the glass is super strong and high protective against breakage. Laminated glass is a kind of safety glass.

Specification:

Glass thickness :25.52mm toughened laminated glass

Other glass thickness: 9.52mm toughened laminated glass, 11.52mm toughened laminated glass, 13.52mm toughened laminated glass, 17.52mm toughened laminated glass, 21.52mm toughened laminated glass, 31.52mm toughened laminated glass, 39.52mm toughened laminated glass etc

Min size: 300x300mm

Max size: 3300x13000mm

Glass thickness: 44.4 laminated glass,55.4 laminated glass,66.4 laminated glass,88.4 laminated glass,1010.4 laminated glass, 1212.4 laminated glass,1515.4 laminated glass, 1919.4 laminated glass etc

Glass color: clear laminated glass,low iron laminated glass,dark green laminated glass,F green laminated glass,bronze laminated glass,ford blue laminated glass,dark blue laminated glass,Euro gray laminated glass,dark gray laminated glass,frosted laminated glass,silk screen laminated glass etc.

PVB thickness: 0.38mm laminated glass,0.76mm laminated glass,1.14mm laminated glass,1.52mm laminated glass,1.9mm laminated glass

Laminated tempered glass features:

1.Safety glass features: Due to PVB have good adhesive, laminated glass breakage will bond by pvb film and will not fall down.

Tempered glass features: Toughened laminated glass will break into small granular after breakage, the breakage will not harm human beings.

3.Sound resistance function: The density of film are different with glass so the film can stop sound transmission.

4.UV rays resistance: Tempered laminated glass reduces the penetration of UV rays and protect indoor objects from UV rays radiation.

5.Fire resistance function: Toughened laminated glass can protect buildings against fire, have the function of anti fire at some degree.

Applications:

Tempered laminated glass have wide usage in architecture, mainly use in following areas:

1. Glass railings, glass balustrade, glass fence, swimming pool fence etc.
2. Glass partition, glass partition wall, etc
3. Glass door, show door, shower screen etc
4. Glass facade, glass curtain wall

Quality Certificates:

25.52mm tempered laminated glass are produced strictly under ISO9001 Quality System and have passed following domestic and international quality standards:

1. 25.52mm toughened laminated glass meet CCC(Chinese Safety Glass Compulsory Certification)
2. 25.52mm toughened laminated glass meet China laminated glass standard GB9962.
3. 25.52mm toughened laminated glass meet meet European safety glass standard EN12543, EN12510.
