

# SGG 10

SGG 10 is a safety glass consisting of two 2 mm thick glass panes bonded together with a PVB or EVA interlayer. It is designed to provide protection against breakage and falling objects.

SGG 10:

1. **SGG 10** is a safety glass consisting of two 2 mm thick glass panes bonded together with a PVB or EVA interlayer.
2. **SGG 10** is a safety glass consisting of two 2 mm thick glass panes bonded together with a PVB interlayer. It is designed to provide protection against breakage and falling objects.
3. **SGG 10** is a safety glass consisting of two 2 mm thick glass panes bonded together with a PVB interlayer. It is designed to provide protection against breakage and falling objects.
4. **SGG 10** is a safety glass consisting of two 2 mm thick glass panes bonded together with a PVB interlayer. It is designed to provide protection against breakage and falling objects.
5. **SGG 10** is a safety glass consisting of two 2 mm thick glass panes bonded together with a PVB interlayer. It is designed to provide protection against breakage and falling objects.

## SGG 10.38 mm:

1. **SGG 10.38 mm** is a safety glass consisting of two 2 mm thick glass panes bonded together with a PVB interlayer.
2. **SGG 10.38 mm** is a safety glass consisting of two 2 mm thick glass panes bonded together with a PVB interlayer.

SGG 10:

SGG 10 is a safety glass consisting of two 2 mm thick glass panes bonded together with a PVB interlayer.

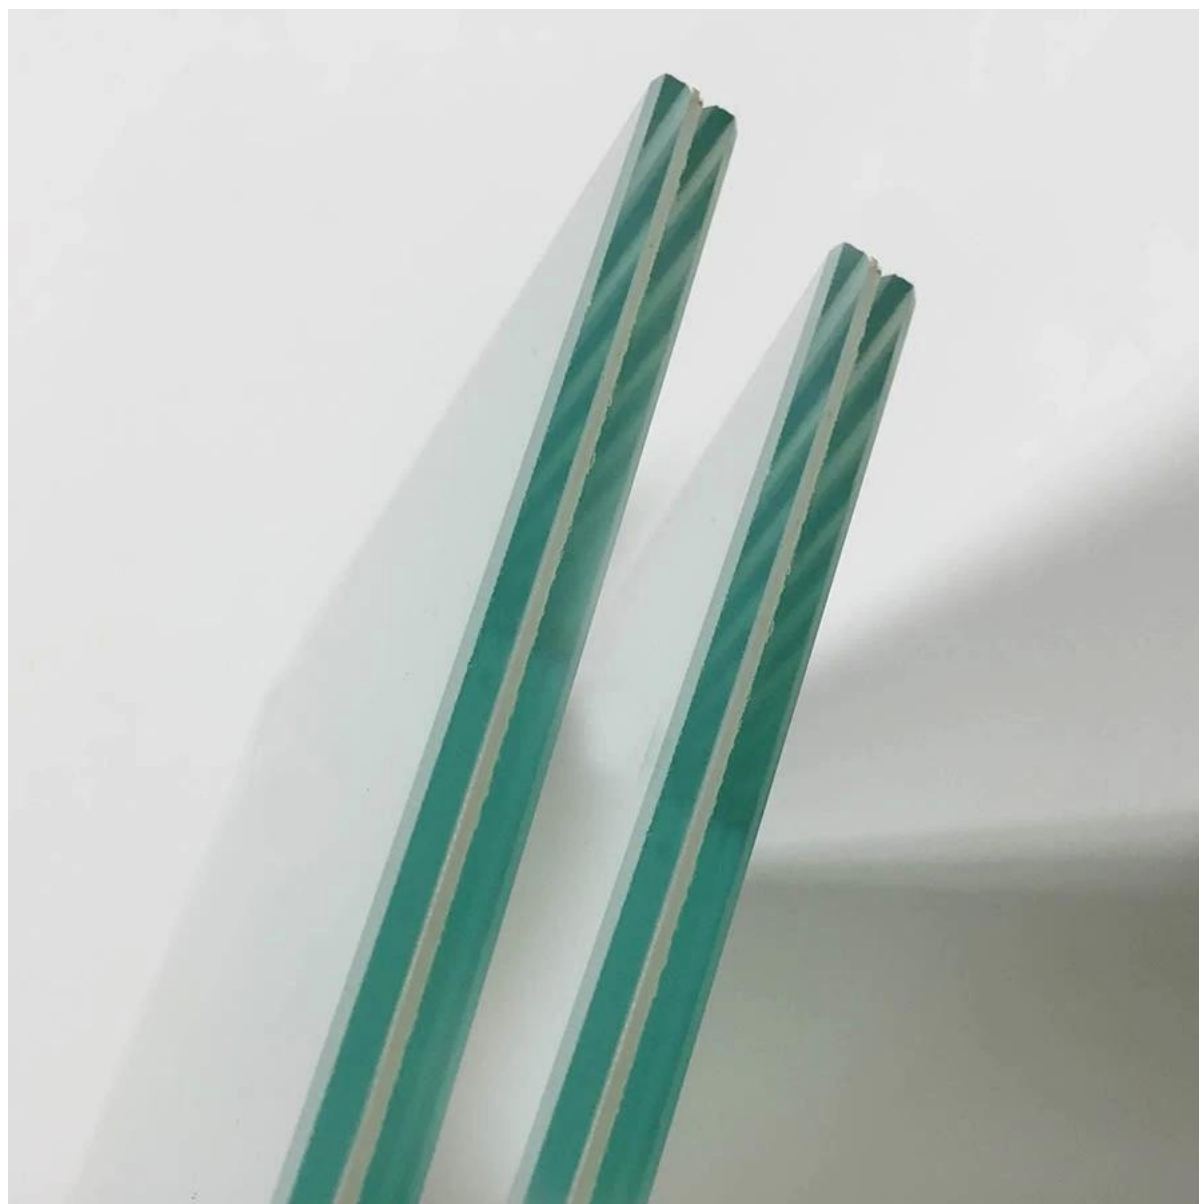

1. **SGG 10** is a safety glass consisting of two 2 mm thick glass panes bonded together with a PVB interlayer.
2. **PVB** is a plastic interlayer used in safety glass to provide protection against breakage and falling objects.
3. **SGG 10** is a safety glass consisting of two 2 mm thick glass panes bonded together with a PVB interlayer. It is designed to provide protection against breakage and falling objects.
4. **SGG 10** is a safety glass consisting of two 2 mm thick glass panes bonded together with a PVB interlayer. It is designed to provide protection against breakage and falling objects.
5. **SGG 10** is a safety glass consisting of two 2 mm thick glass panes bonded together with a PVB interlayer. It is designed to provide protection against breakage and falling objects.

SGG 10:

1. **SGG 10** is a safety glass consisting of two 2 mm thick glass panes bonded together with a PVB interlayer. It is designed to provide protection against breakage and falling objects.
2. **SGG 10** is a safety glass consisting of two 2 mm thick glass panes bonded together with a PVB interlayer. It is designed to provide protection against breakage and falling objects.
3. **SGG 10** is a safety glass consisting of two 2 mm thick glass panes bonded together with a PVB interlayer. It is designed to provide protection against breakage and falling objects.
4. **SGG 10** is a safety glass consisting of two 2 mm thick glass panes bonded together with a PVB interlayer. It is designed to provide protection against breakage and falling objects.
