

SGG 10mm Clear Tempered Glass Balustrade Supplier and Manufacturer In China

Tempered glass balustrade is consists of single tempered glass panel withou or without wooden frame or stainless steel frame. With tempered glass panel, the glass railings appear bigger of the house. It is easily bring elegant, bond and modern sense of interior and external decoration.

Features:

1. Security: 10mm tempered glass is high strength for home stairs and balcony. Also it protect people from injury from broken glass.
2. Decoration: flexible design to be applied to glass panels
3. Economic: one glass panel broken, it is easy to find a replacement instead of change the whole railing.

Styles of tempered glass balustrade

1. Frameless tempered glass balustrade:

2. Stainless steel balustrade with tempered glass:

3. Wooden framed balustrade with tempered glass:

4. Spiral staircase with curved 10mm tempered glass balustrade

Quality of 10mm tempered glass balustrade:

1. in accordance with China standard ISO, CCC
2. in accordance with Europe standard EN12510, EN12543
3. in accordance with North American standard ANSI Z97.1-2009

Difference between tempered glass balustrade and tempered laminated glass balustrade:

1. tempered laminated glass balustrade is higher strength and more safe
2. tempered laminated glass has more designs to choose, such as transparent unique PVB color glass balustrades
3. tempered laminated glass provide higher protection. When glass broken, tempered laminated glass still stays in frame before replacement come. But it is not apply to frameless glass balustrade.
4. tempered glass balustrade is more economic as a balustrade. Many home decoration will choose 10mm tempered glass for handrails.
