

Sun Global Glass 10mm Flat and Curved Yellow & Purple Gradient Glass - China Building Glass Manufacturer and Factory

10mm Gradient glass is safety architectural glass with color gradient effect. we can custom gradient glass in variety of colors and sizes. Sandblasted glass as long as glass through the frosting processing can be called frosted glass. With fingerprint free, sandblasted glass offers a wealth of opportunities to architects, interior designers and decorators. Because of its consistent quality, durability and rich outlook, acid etched glass creates a translucent satin appearance which obscures view while maintaining a high level of light transmittance.

Features and Advantages:

- 1.Non fingerprint glass
- 2.Consistent finish and appearance
- 3.Uniformly smooth and silky surface, translucent and matte in appearance
- 4.High light transmittance ensures maximum light, still maintaining privacy
- 5.Does not peel or discolor like films
- 6.Does not scratch off like coating

Specification:

Color: Clear gradient glass, blue gradient glass, bronze gradient glass, green gradient glass, gray gradient glass

Thickness: 4mm gradient glass, 5mm gradient glass, 6mm gradient glass, 8mm gradient glass, 12mm gradient glass, 15mm gradient glass, 19mm gradient glass

Size: customized size based on customers' drawing

Process: water jet cutting, drilling, edging, etc

Application:

Interior partitions

Office enclosures

Shower and bath enclosures

Interior and exterior doors
