Shenzhen Sun Global Glass

The main difference between laminated glass and tempered glass :

The laminated glass will remain on inter-layer when it’s broken, while the toughened glass will be shattered into small NO sharp pieces.

How to determine the glass type □

For ground floor ,both tempered glass or laminated glass are okay,while for the floors above we recommend laminated glass in case of high falling risk.

Functions:

Glass railings offers a way to ensure safety on decks,staircases and swimming pools ,

preventing the possible falling. They also offer protection from the external elements when installed outside doors.

Glass railing systems act as a barrier against strong winds, rain, and heavy snowfall etc bad weather conditions.

Quality standards:
The tempered laminated glass produced by SZG glass factory meets standards as below:
1. Chinese Safety Glass Compulsory Certification (CCC) and ISO 9001.
2. BS 6206 certificate of UK safety glass standard.
3. EN 12150 CE certificate of European safety glass standard.
4. SGCC certificate of American laminated safety glass standard.
