

SZG 21.52mm laminated glass with bottom silk screen print- best building glass manufacturers and factory in China

21.52mm laminated silk screen print glass is a kind of laminated glass, which is made of one layer of [10mm silk screen glass](#) and one layer of 10mm tempered glass sandwich together. The middle layer is 1.52mm PVB film, after heating and high-pressure special process, the two layers of glass adhere together. With the process of lamination, the glass is super strong and high protective against breakage. It's a kind of safety glass for modern building construction.

Laminated tempered glass features:

1. Tempered glass characteristic: screen printing laminated glass has tempered glass features, that is, after breakage, will break into small granular after breakage, will not harm human beings.

2. Safety glass features: Due to PVB have strong bondness, laminated glass breakage will not fall down and bond by pvb film and .

3. Sound resistance function: The density of film are different with glass so the laminated glass can stop sound transmission at some level.

4. UV rays resistance: Silk screen laminated glass reduces the penetration of UV rays and protect indoor objects from UV rays radiation.
