

3mm silver mirror glass manufacture in China

3mm Silver mirror glass is produce by high quality of [3mm clear float glass](#), not all [clear anneal glass](#) can be coated to be mirrors. Then glass sheets were washed by purified water, polished, sprayed, sensitized; using high quality of silver coating on the tin side of glass panel, this silver coating processes is consecutive. There are two layers of waterproof paints on the surface of glass:

- 1.The first paint-drain to be corrosion resistant and dry;
- 2.The second paint-drain to be waterproof, hard and dry, back paint anti-corrosion, dampness resistant and water proof.

Mirror grade 3mm clear float glass must be high end quality, which have transparent and flat surfaces, no bubbles, no waves, to ensure people can have a true and clear reflection when they look through mirrors.

3MM silver mirror features:

- 1.High reflection with clear and vivid image
- 2.Two layers coating process, to realize a perfect resistance to corrosion and moist.
