Sun Global Glass 10mm flat and curved yellow and purple gradient glass - China building glass manufacturer and factory

10mm gradient glass is a safe architectural glass with a color gradient effect. we can customize tilt glass in different colors and sizes. Sandblasted glass, as long as the glass goes through the frosting process can be called frosted glass. Fingerprint-free sandblasted glass offers plenty of opportunities for architects, interior designers and decorators. With its consistent quality, durability and rich views, acid-etched glass creates a translucent satin look that obscures the view while maintaining high light transmission.

Features and benefits:

1.No fingerprint glass

2. Uniform surface and appearance

3. Uniformly smooth and silky surface, translucent and matte

4.High light transmission ensures maximum light while still maintaining privacy

5.The peel or color does not change from the films

6. Does not scratch like a coating
