

Glass perfect decorative materials SGG 4mm dark blue tinted float glass

4mm dark blue tinted float glass is produced in the same way as [4mm clear float glass](#), except adding metal or other Elements during the production. That means it is produced by adding colorant in ordinary clear float glass. 4mm dark blue tinted float glass not only can significantly absorb the heat rays energy from the sun, but also keep the good energy-saving and transparency feature of decorative glass. It also called heat-absorbing glass and color glass. It's different from stained glass.
