

4mm Low Iron toughened glass for greenhouse - best greenhouse glass suppliers and manufacturers in China

There are two types of glass for greenhouse, clear tempered glass and low iron toughened glass. In order to directly get more sunlight, it is best to choose ultra clear tempered glass to use as greenhouse, and it must be in tempered glass to prevent the glass from breaking. 4mm ultra [clear tempered glass](#) greenhouse light transmission can reach 89% and 4mm low iron glass can reach 96%.

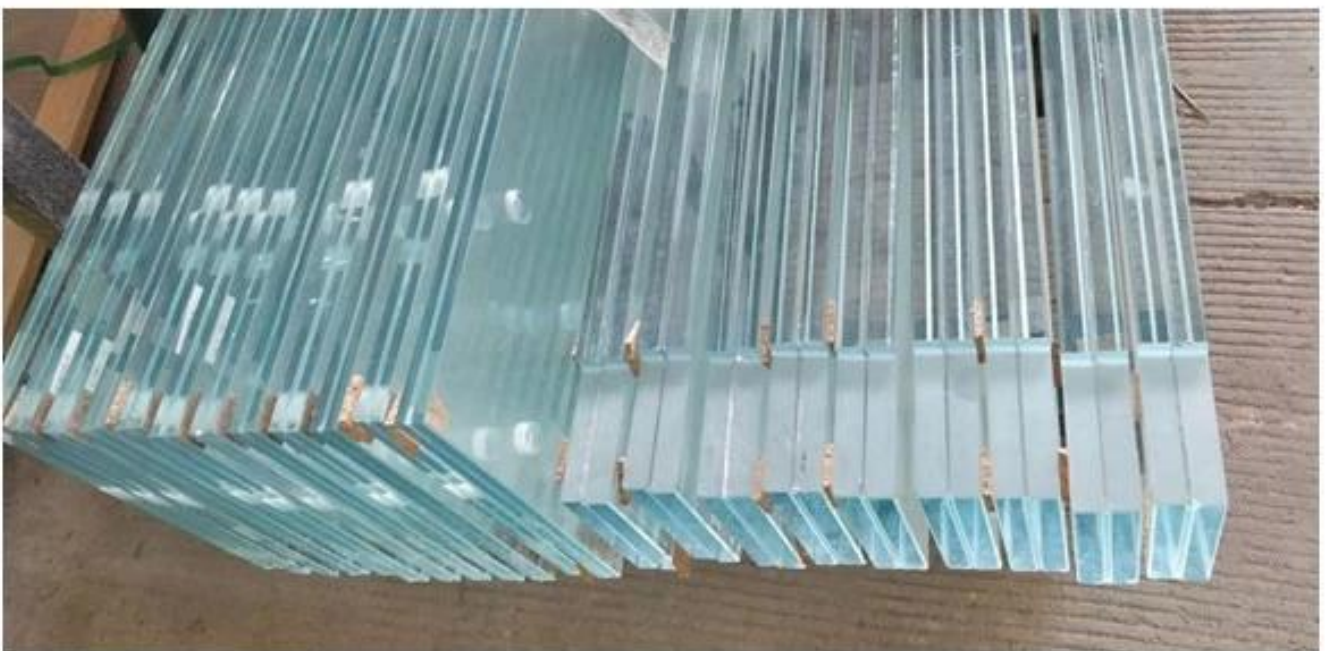

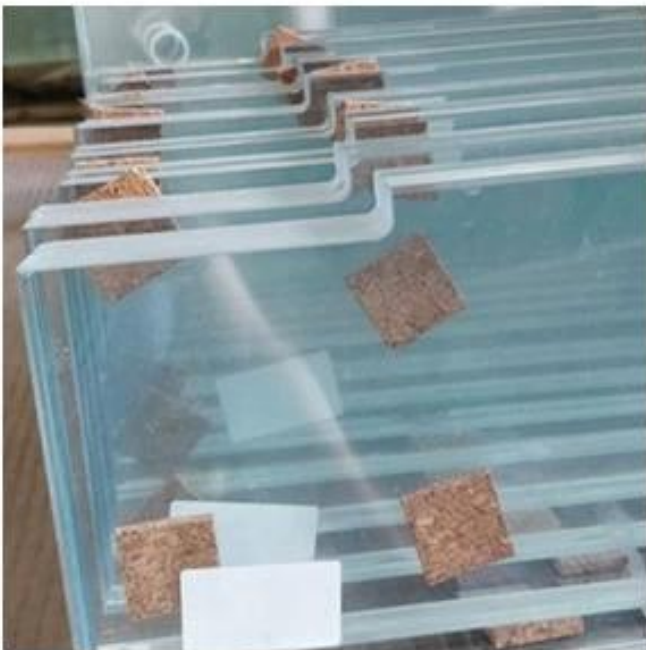

Specification:

Glass Type: Ultra clear toughened safety glass

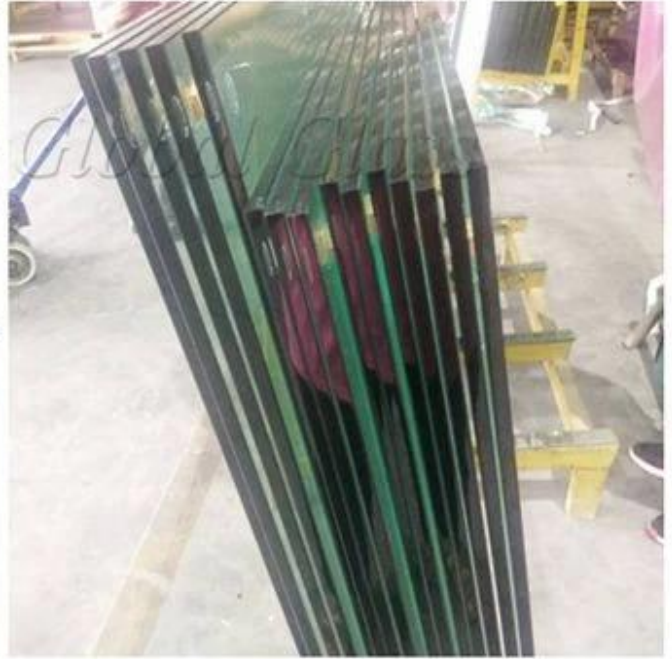

Thickness: 4mm 5mm 6mm 8mm 10mm etc

Max size:, customized sizes based on drawing

Process details: edges, and other process will be exact same as clients drawing.

Production of Greenhouse Glass:

Quality control:
