

SGG 5.5mm Ford blue [reflective glass](#) - Energy saving glass

The reflective glass also called coated glass. It's covered with layer or layers of metal, alloy or metallic compound on the glass surface. With the development of architectural aesthetics, the people put forward more and more high request to building glass. Require it has both proper lighting and good sunshade effect, also require it has a certain energy saving function and colorful decoration effect. The reflective glass solve these problems successfully.

Online reflective glass and Offline reflective glass:

1. Online reflective glass is also called Hard coating reflective glass. The coating process is proceeded when the float glass in producing and the glass still hot in the furnace.
2. Offline reflective glass is also called Soft coating reflective glass. The coating process is proceeded after the float glass finish the production and the float glass could't be placed for a long time. Compared with Online reflective glass, the Offline reflective glass is easy to oxidized, so always deep processed as laminated glass, insulated glass etc.
