

SGG 5mm Dark Grey Float Glass - Heat absorbing & solar heat gain coefficient

5mm dark grey float glass is produced in the same way as [5mm clear float glass](#) except adding metal or other Elements during the production of 5mm clear float glass. That means it is produced by adding colorant in ordinary clear glass. 5mm dark grey float glass not only can significantly absorb the heat rays energy from the sun, but also keep the good energy-saving and transparency feature of decorative glass. So It's different from stained glass. It also called heat-absorbing glass and color glass.

Features:

- 1.UV rays:**80% of the transmission of harmful ultraviolet radiation can be reduced by 5mm dark grey float glass.
- 2. Solar control:** 5mm dark grey float glass can effectively reduce heat transfer and sunlight control.
- 3. Decorative:** tinted glass can offer more excellent options for exterior and colorful decoration.
- 4. Deep process:** High quality 5mm dark grey float glass is good for deep processing, can be cut to size,tempered,edge polishing and made of laminated glass, frosted glass, insulated glass,etc.
