SGG high quality 5mm clear patterned glass rain supplier and manufacturer in China

Patterned glass is a kind of decorative tanslucent flat glass,which embossed on one side or two side and roll over glass plates whilst they are still hot and moldable. It not only provides function of visual screen but also creates aesthetic senses of changing lights and shades.Special transparency effect--The figured glass can distill comfortable volumes of light and create a delicate obscurity effect.
It widely used in Offices, buildings, hospitals, sports grounds, body-building rooms, bathrooms, lavatories, washrooms, etc. Patterned glass can be tempered and laminated for your safety requirements.

Features:

Numerous patterns are available to meet the needs of decoration.

The patterns are able to soften the light in a space and ,at a suitable angle,to curtain the visibility

through it.

The patterns never fade,it also can be cut ground,drilled,tempered ,laminated and printed.

Light transmittance ratio >89%

Cutting size is very accurate,the tolerance controlled within 1mm.
