

Safety Glass Pivot Door

The Pivot door system turns opening a door into a creative act: the doors swing around the asymmetrically located axis, creating a temporary spatial structure. This could be the reason why Le Corbusier preferred this kind of swinging doors. With just a gentle push on the comfortable handle on the long side of the frame the door delicately glides open.

Advantages

- Almost frameless door leaf.
- Inward or outward opening.
- Frame part-invisibly integrated.
- Flexible integration in both.
- Transition without a threshold -barrier-free entrance.
- Drainage profile integrated in the system.
- Classy design with door leaves made of glass aluminum ,stainless steel, etc.
- Various locking options.
- 8 Different modular installation variants.

- Max. leaf weight: 250 kg / 350 kg*
- Distance rotary leaf axis <> stop:
From 150 mm to 1/2 leaf width
- Locking in 90° open position: yes
- Optional door closer at top: yes

Applications

Luxury villas
 Senior clubs
 Large wine doors
 Indoor gardens and other empty meaning partition use
 Etc.
