

SGG 8mm 10mm 12mm frameless frosted tempered glass door, acid etched glass door- CE/ BS 6206/ISO9001/CCC Standard Quality

Frosted glass door is made by frosted tempered glass (acid etched glass or sandblasting glass) or annealed frosted glass. Mainly thickness of 8mm 10mm 12mm. Use frosted glass as door panel, because frosted glass is translucent, it lets light through the door, but stops clear vision. It also gives an elegance touch to the door. The glass door could be full screen acid etched, or frosted patterns, like stripes or complex patterns. Frosted glass door can also be made of laminated glass and insulated glass to achieve different functions required, such as sound proof glass door.

Features:

Safety- Frosted tempered glass door is made of [tempered glass](#), it is 5 times stronger than annealed glass. If breakage happened, the glass will be shattered into many small glass fragments without sharp edges. It is protected people from serious injury.

Privacy- Frosted tempered glass can provide different degree of privacy protection by different design. We have full screen [frosted glass](#), and partial frosted patterns.

Decoration- Sun Global Glass offer different designs of frosted tempered glass, such as full size frosted glass, geometric patterns frosted glass (diamond, stripes, dots, squares...), complex patterns frosted glass.

Function- frosted tempered glass can also consist of laminated glass to prevent inbreakage, or sound insulation glass door.
