

SGG 8MM Euro Gray Reflective Glass - Energy Saving glass

Euro gray reflective glass is a kind of energy saving glass, which produced the same as tinted glass process meanwhile coated metal oxide in glass surface. his special metallic coating also provides a one-way mirror effect, preventing visibility from the outside and thus preserving privacy. 8mm euro gray reflective glass is made by [8mm euro gray tinted float glass](#) .which available for tempering, heat strengthened and laminating.

8mm Euro Gray reflective can be produced as [8mm Euro Gray tempered glass](#), 8mm+8mm euro gray reflective glass, 8mm+8mm insulated glass and 8mm euro gray acid etched glass.

Advantages of on-line coating reflective glass

Reflective glass can be divided in on-line coating reflective glass and off-line coating reflective glass. The coating procedure during the float glass lehr. So the coating is highly stable. It won't easy to fall apart. Comparing to offline reflective glass, the color of glass is fixed

8MM euro gray reflective glass specification:

1. Glass thickness: 8mm
2. Available total thickness: 4mm, 5mm, 5.5mm, 6mm, 8mm, 10mm
3. Stock Size: 1650*2440mm, 2140*3300mm and 2250*3300mm
4. Processing capacity: 8mm euro gray reflective glass can be processed as 8mm euro gray reflective tempered glass and 8+8mm reflective laminated glass.
5. Durable and zero resistance, excellent for the Temple and thermal bending.

Features:

1. Providing a mirror effect
2. Excellent solar control capacity, prevent interior furniture faded
3. Superior abrasion resistance performance
4. Top lighting of and blocking heat properties

Applications:

1. Curtain wall, windows and facade
2. Showcase, shop display and partition
3. Processing such as tempering and laminating
