

China 8mm light grey float glass factory

8mm light grey float glass is produced by the float process with the addition of small quantities of metal oxides to color the normal clear glass mix. It can reduce both visual and radiant transmittance. This coloration is achieved through adding metal oxides at the smelting stage and can effectively reduce heat transfer and sunlight control. So It's also called heat-absorbing glass and color glass. but it's different from stained glass.

Specifications:

Glass type: 8mm light grey float glass

Other name: 8mm Euro grey float glass, 8mm light grey glass, 8mm grey tinted glass

Other color: blue, bronze, green,etc.

Thickness: 4mm 5mm 5.5mm 6mm 8mm 10mm

Stock size: 1650x2140, 1830x2440, 2140x3660, 2140x3300, 2250x3300, customized size

Package: Packed with strong exportation wooden crates

Features:

- 1. UV rays:** 8mm light grey float glass can reduce even 80% of the transmission of harmful ultraviolet radiation.
- 2. Solar control:** 8mm light grey float glass can reduce the heat transfer and sunlight control and energy.
- 3. Bright color:** can increase the beautiful appearance of structure.
- 4. Processing range:** With high quality good for processing. Such as can be cut to the size in need,tempered,edge grinding and processed to laminated glass, insulated glass, frosted glass, silk screen printing glass etc..

Application:

1. 8mm light grey float glass can be used as table tops, balcony, curtain wall, railings, glass balustrade, glass facade, glass partition etc. after being tempered ,laminated and insulated.
