

SZG Aluminium U channel for railing glass --- Best aluminium U channel provider in China

SZG aluminium U channel are produced by aluminium alloy. Aluminium Channels (also known as U Channels) are general purpose extrusions and can be used in many applications. Our Aluminium Channels are available in alloy grade SS-304 or SS-316. This alloy has a medium strength and excellent corrosion resistance making the U channels ideal for indoor and outdoor use of railing.

There are three installation methods: underground, ground, and side, Stainless steel cover can be installed if needed. Except aluminium U Channel, there are handrail, handrail bracket/support, glass clamps those

accessories to compose the railing/fence/balustrade glass as well. Customer can choose one or two above hardware to make customized design.
