

SGG 8mm Bronze Tinted Glass wholesaler- Excellent decorative glass materials

Tinted float glass which reduces both visual and radiant transmittance, is produced by the float process with the addition of small quantities of metal oxides to color the normal clear glass mix. This coloration is achieved through adding metal oxides at the smelting stage.

Features:

- 1. UV rays:** tinted float glass can reduce 80% of the transmission of harmful ultraviolet radiation.
- 2. Solar control:** tinted float glass can efficiently reduce heat transmission and solar control.
- 3. Decorative:** natural tinted colors offer more excellent options for exterior and interior decoration.
- 4. Deep process:** perfect quality of glass for deep processing, cut to size, edge polishing, tempering, lamination, and insulate.
