

SGG 12mm French Green Tinted Glass- Easy Cut, Can Be Temperable Or Laminated

Tinted Glass is made of molten glass mixing with a prescribed quantity of tint agent, which flows through tweek to Tin Bath and then to Lehr. While floating through the molten tin, the glass under the works of gravity and surface tension becomes smooth and flat at both sides. The amazing advantage of tinted glass is that it can reduce solar transmittance.

To ensure through precise quality control that the tinted glass it makes is the same within a batch and across batches- year after year. They all have uniform and sufficiency thickness, color constancy.

Sun Global Glass have full range of vivid colors, excellent performance characteristics and post-production treatment possibilities. All make these advantages make **SGG tinted glass** the ideal choice for architects in any new construction or renovation project.

Features:

- 1. UV rays:** tinted float glass can reduce 80% of the transmission of harmful ultraviolet radiation.
- 2. Solar control:** tinted float glass can efficiently reduce heat transmission and solar control.
- 3. Decorative:** natural tinted colors offer more excellent options for exterior and interior decoration.
- 4. Deep process:** perfect quality of glass for deep processing, cut to size, edge polishing, tempering, lamination, and insulate.
