

Aluminium Frame Double Glazed Glass Folding Door

Aluminium alloy folding door is not only beautiful and easy, and varied in styles and convenient to use, which can save the occupied area of the door. Usually it applies in the region of the small family kitchen, bathroom, or toilet. Kitchen and toilet area is relatively high humidity and temperature, combined with aluminium alloy folding door has the characteristic such as heat preservation, moistureproof, therefore, aluminium alloy folding door is a good choice for kitchen and toilet area.

Advantage

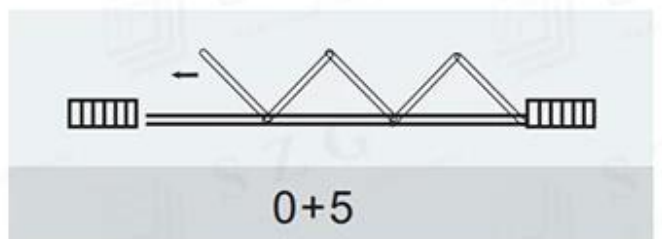

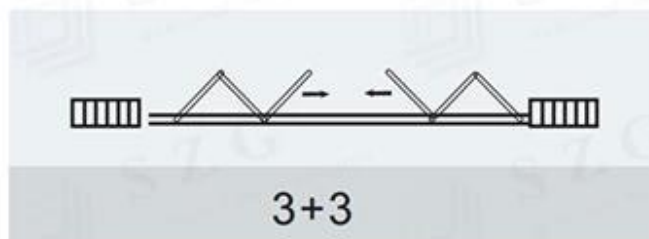

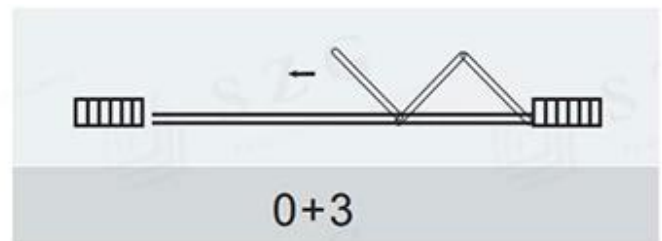

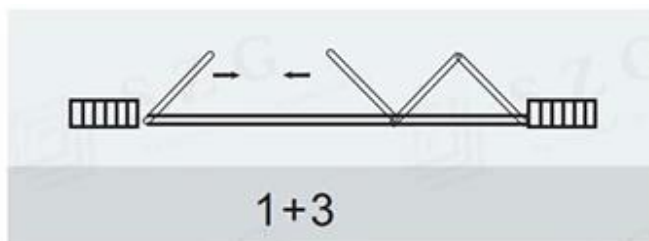

1.Excellent decorative effect.Glass could be made into different patterns. And beautiful decoration between the double glazing panels will be a nice choice.

2.Excellent performance.Aluminum alloy door has the very good performance of high wind pressure resistance, air permeability resistance and water leakage resistance (can reach national standard grade 1 or higher), using thermal profiles and hollow glass and has good energy saving effect. The folding door can meet the need of any high grade and high house building, is recognized as top grade products at home and abroad.

3. Light weight.Density of aluminum is 1/3 of the steel, but higher strength,aluminum profile for window is 5 kg per square meter, steel to 10-20 kg, plastic window frame weighs more than 10 kg.
