Function

Weather protection

Excellent protection of windows from rain, snow, hail, wind and grit. Flying leaves and other wind-borne objects will not damage your windows.

Protection from prying eyes

Reliable protection of your privacy and an opportunity to reside peacefully in your own house.

Protection from the sun

Comfortable cool atmosphere on hot summer days; protection of curtains, furniture and carpets from colour fading under the influence of the sun's ultraviolet rays.

Power saving

Efficient use of air-conditioners and heating systems due to the additional insulation which provides heat saving in winter and cool saving in summer.

Protection from noise

Reduction in unwanted noise levels for more efficient work, relaxation and uninterrupted rest.
