

Frameless Sliding Folding Glass Window

The frameless and fully retractable balcony glass and terrace glass wall systems transforms your unused balcony or terrace into a solarium where the changing seasons can truly be enjoyed. Imagine the possibilities of extending the outdoor season. Creating that room with a view you always dreamed of. Creating a better home.

The glass used in the balcony system consists of tempered glass, broken into small pieces if broken and does not harm the environment.

Folding glass balcony systems are designed and manufactured to withstand hard winds. In our glass balcony system, different colors of smoked, bronze, reflective and satin glass can be applied upon request. To make your balconies more functional and to create more pleasant living spaces, we recommend that you close your balconies with a glass balcony system.

Applications

Balcony

Terrace

Hotel

Facade

Features

1. It is not limited by the opening direction and can be opened to any position space at will. The opening area can arrive 98%.
2. Each two pieces of glass is a movable unit and are connected through stainless steel hinges, it is pull inward at the hinge connection, fold and open.
3. The load-bearing wheel is installed at the left and right ends of the two pieces of glass respectively. There is no load-bearing wheel at the connection position of the two pieces of glass, and each piece of glass has two load-bearing wheels.
