

Motorized Aluminium Louvered Roof Pergola

Pergolas and horizontal louver roof are completely made of aluminum and allows light and breeze when open. Using an electric telescopic engine connection system through parts and aluminum extrusions specially designed, the slats are closed completely sealed preventing the passage of light and water. When closed the slats become channels that carry the water to the sides that have their own system of canals and water should turn towards the poles where it drains.

Benefits of Louvered Roof Pergola for Pool Cover

1. The ability to spend more time outdoors.
2. Create a space to have more enjoyment while outdoors.
3. Extend your seasons throughout the year!
4. Live healthier by blocking harmful UV light.
5. Stay dry and sheltered in almost any weather condition.
